

Despite spending a record **\$370,000 per classroom**,¹ the School District of Janesville's test scores continue to plummet.²

- **IN READING**: Only 38% of Janesville students are college/career-ready.
- **IN MATH**: Only 37% of students are college/career-ready.

✘ Janesville spends more than its peers like Eau Claire and Stevens Point but gets lower results – just 1 out of every 3 students are proficient in math!²

When spending soars and enrollments decline – the status quo has to change!

**MAKE YOUR
VOICE HEARD
AND HELP SAVE
OUR SCHOOLS!**

WHAT DO FAILED POLICIES LOOK LIKE? **GOVERNOR TONY EVERS.**

Under Tony Evers' watch, Wisconsin schools have transformed from being a leader to being left behind nationally. During his time at the Department of Public Instruction, Wisconsin students fell from 9th to 24th in math among states. Students scored higher before Evers took office.¹

Our schools received **more money** and produced **worse results!**

Students, parents, teachers, and taxpayers deserve better.

We need real accountability, parents put first, and common-sense ideas that get schools back to the basics. **Contact Governor Evers at (608) 266-1212 and tell him to TURN OUR PUBLIC SCHOOLS AROUND.**

FAILED POLICIES:

- Tony Evers has been pulling strings for more than two decades – all while school scores plummeted.
